

HAAG — Unit Researcher Guide

1. What is a Unit?

- A unit is a group of HAAG projects organized around a similar research topic
- Your project will be assigned to a unit at the start of the semester
- Units meet bi-weekly — this is separate from your individual project meetings
- The purpose is to share what each team is working on, get feedback from faculty and other researchers, and get ideas flowing across projects
- Every project is required to send one representative to each unit meeting
- All unit participation is monitored and counts toward your participation grade

2. Who is the Project Representative?

Each project designates one researcher to attend unit meetings as the project rep. The rep is responsible for representing the full team — not just their own work. This role can rotate across team members each semester.

3. How the System Works

The goal is for the unit meeting to give everyone — faculty, advisors, and other research teams — a complete picture of where each project is and what they are thinking about. This is how ideas and feedback flow across the unit.

1. Non-attending team members fill out their slide template and send it to the rep before the meeting
2. The rep collects all slides, builds the presentation, and posts an agenda to the unit channel
3. At the unit meeting, the rep presents the full team picture — faculty and other teams ask questions, give feedback, and share ideas
4. After the meeting, the rep shares feedback and action items back with the team and posts a recap to #time-log

4. What Non-Attending Team Members Must Do

Step 1 — Fill out your slide template (due before every unit meeting)

Every team member who is not attending the unit meeting must complete the slide template and send it to the rep before the meeting.

Download the template: HAAG_Weekly_Update_Template.pptx — complete slides 2-5 and send to your rep.

The template covers four things:

- What you worked on this week
- What it means for the project
- What you are working on next
- Any blockers or questions for the group

It takes no more than 5 minutes to complete. Be specific enough that the rep can present your slide without asking you follow-up questions.

Step 2 — Submit your weekly report to both channels

Every Friday by 5pm, submit your weekly report as a PDF to:

- Your project channel
- Your unit channel

A Slack bot will remind you every Friday. Respond to the bot to confirm your submission. Responses are logged for grading.

5. What the Project Rep Must Do

Before the Meeting

5. Collect slides from every non-attending team member
6. Consolidate all slides into one presentation — one slide per team member plus your own update
7. Post your agenda to the unit Slack channel before the meeting:

[Project Name] — Agenda for [Date]

- [Team member 1] — [one line summary]
- Questions or blockers for the group: [list]

During the Meeting

8. Present each team member's slide — explain what they worked on and what it means
9. Raise any blockers or questions to the faculty advisor and other teams
10. Take notes on feedback and ideas from the group

After the Meeting

11. Post a brief report to the unit Slack channel within 24 hours:

[Project Name] — Post-Meeting Report [Date]

- What we discussed
- Feedback and ideas received
- Action items for the team

12. Share feedback and action items with non-attending team members
13. Post the meeting recap to #time-log — see Section 7 below

6. Working Sessions

In addition to unit meetings, every project is required to participate in at least one self-organized working session per semester with another team in their unit.

Requirements

- At least 2 teams must be present
- At least 3 people total
- Self-organized by researchers — not faculty led

How to Report It

After your working session, post to your unit Slack channel:

Working Session Report — [Date]

Teams: [Team 1], [Team 2]

Attendees: [Names]

What we worked on: [1–2 sentences]

7. Recording Instructions (After Every Unit Meeting)

After each unit meeting the project rep must post the following to the #time-log channel on HAAG Slack.

Step 1 — Get the recording link

14. Open the Teams chat for the unit meeting
15. Find the recording and click View Recap

16. Wait a few minutes for the transcript to generate
17. Click Share → Copy Link

18. Copy the link

Step 2 — Generate the AI summary

19. In the same View Recap screen click Transcript
20. Copy the full transcript text

21. Paste it into any LLM and ask it to generate a meeting summary
22. Copy the summary

Step 3 — Post to #time-log

Post the following to the #time-log channel:

- Meeting recording link
- Attendance list (who attended)
- AI-generated summary

8. Enforcement and Grading

All of the following are monitored for your grade. There is no extra credit — these are requirements.

Requirement	Who	How it is tracked
Slide template sent to rep before meeting	Every non-attending member	Bot asks before each meeting — response logged
Weekly report submitted to both channels	Everyone	Bot reminds every Friday — response logged
Agenda posted before unit meeting	Rep	Checked in unit channel
Post-meeting report posted	Rep	Checked in unit channel within 24 hours
#time-log recap posted after meeting	Rep	Checked in #time-log channel
Working session reported in unit channel	Everyone	Checked in unit channel

How Grading Works

1. Weekly Report Tracking — via Bot

Every Friday the Slack bot posts in the unit channel asking researchers to confirm they submitted their weekly report. Responses are automatically logged to an Excel sheet. Staff review the sheet to see who is and is not submitting consistently.

2. Slide Template Tracking — via Bot

Before each unit meeting the Slack bot posts in the unit channel asking non-attending members to confirm they sent their slide to the rep. Responses are logged to the same Excel sheet. The rep also confirms in the channel who sent their slide and who did not.

[Screenshot placeholder: Slack bot slide template reminder before unit meeting]

3. Meeting Recap Tracking — via #time-log

After every unit meeting the rep posts the meeting recording link, attendance list, and AI summary to the #time-log channel. Staff check #time-log to confirm the rep completed their post-meeting responsibilities. No post to #time-log means the rep did not complete their requirement for that meeting.

[Screenshot placeholder: Example #time-log post from rep after unit meeting]

What Happens If You Don't Complete Requirements

- Missing one week — bot sends a reminder the following week
- Missing two or more weeks in a row — flagged to a staff member who will follow up directly
- Consistent non-participation — reflected in your grade at the end of the semester
